

Existence-ok Industries Presents, CREATING A NEW SIMPLE WEBSITE

1. Click the **File** menu in Microsoft FrontPage 2002, choose **New** and then click **Page or Web**.
2. Click **Web Site Template** in the **Task Pane**.
3. Select **One Page Web**, and then click **OK**.
4. Click the **View** menu, Click **Navigation** to display your new Website.

5. From the **File** menu, choose **New** and then **Page or Web**.
6. Click **Blank Page** in the **Task Pane**. (A new page is added below the Home Page in Navigation View. Repeat this until you have three pages.)
7. Double click **Home Page** to open it in Page view. (You will see a blank page.)
8. On the **Format** menu, choose **Shared Borders**. The **Shared Borders** dialog box appears.

9. Under **Apply to**, select **All pages**.
10. For this same site select, **Top**, **Left**, and **Bottom**. Under **Top** select **Include navigation buttons**. Click **OK**.
11. Click the **Format** menu, choose **Properties ...**
12. ... set the properties of **Link Bar Properties**.
13. On the **Format** menu, choose **Theme. ...**
14. Click **Insert**, click **Hyperlink** to insert a link to another page.
